Remark Holdings, Inc. releases version 3.0 of its AI-powered video analytics platform to include weapons, smoke, and fire detection modules

February 16, 2023

LONDON, Feb. 16, 2023 /PRNewswire/ -- Remark Holdings, Inc. (Nasdaq: [MARK](#)), a diversified global technology company with leading artificial intelligence ("AI") powered computer vision solutions, today announced the release of version 3.0 of its innovative and extensible video analytics solution, Smart Safety Platform ("SSP"). The latest release added features that include weapons, smoke, and fire detection with actionable intelligence.

The SSP 3.0 is an AIoT ("Artificial Intelligence of Things") video analytics platform, designed for varying architecture applications, including AI-edge box or AI-server, and in support of an on-premise, hybrid, or cloud deployment.

Dr. Robert Xiaoyun Yang, Director of R&D at Remark Holdings comments, "We are pleased to report that our Smart Safety Platform was successfully put to the test at last week's Integrated Systems Europe (ISE) event in Barcelona, Spain. We are excited about the new features in our pipeline that we will showcase at the Embedded World Conference, Nürnberg, Germany in March.

The Smart Safety Platform focuses on real-time video analytics, whereas other solutions within the same space focus on post-event analysis. Additionally, SSP has been built using the latest architecture, standardizing its deployment and maintenance from AI-edge box to server and cluster, making it a very scalable solution.

Smart Safety Platform 3.0 key features include:

- Video search such as intelligent pre and post-forensic investigation that provides meta-data searches by utilizing physical and object-recognition attributes to speed up the investigation process
- Face recognition
- Intrusion / loitering / object / trespassing detection
- Live real-time large-capacity people counting and crowd and flow analysis
- Vehicle attribute search / Automatic number-plate recognition ("ANPR")
- Preventative behavioral analysis such as loitering, dropping of unattended bags, vandalism, graffiti, fights
- Weapon detection
- Suspicious fire, object, and smoke detection
- Visual dashboard with actionable insights and reports for daily monitoring and customer flow analysis

"We are committed to delivering affordable AI-driven video analytics to safeguard and protect individuals' lives and create a healthier, safer, and eco-friendlier world. We are working with several integration partners in the USA, UK, Europe, South America, South Korea, and India to further localize the Smart Safety Platform to new regions and their local clients. Our pipeline is strong, partnering with retail stores, local councils, premier league stadiums, entertainment venues, railway stations, and racecourse venues. We look forward to a solid beginning to 2023," says Dr. Robert Xiaoyun Yang.

Remark's solutions work seamlessly with third-party software and products, providing partners and end-users the freedom of choice.

Remark is proud to partner with AAEON, be part of the Milestone Systems Marketplace and be a certified Genetec Silver Technology partner.
